

## CASE STUDY

Mary is usually happy but she has recently become withdrawn and has a reduced appetite. She has also become less tolerant with toothbrushing.

What do you think could be the possible cause/s of Mary becoming less tolerant to toothbrushing and how would you manage this?

## CASE STUDY

George has a loose upper denture and his gums bleed a lot when they are brushed.

How would you manage this residents oral care?

## CASE STUDY

You have noticed that Vera is leaving food in her mouth.

What do you think could be the reason/s for this?

How would you manage this resident?
